

THE OIL & PROCESS WATER SPECIALISTS

MANUAL OIL WATER SEPERATOR (MOWS)

The Manual Oil Water Separator from Enviro Now® is a simple system for removing fats, oils and greases from large flow rates.

One set of six socks sized 1.1 meters (L) X 210 mm ID flow rates.

- Flow Rate per Minute: 16,800 Litres
- Flow Rate per Hour: 1,008,000 Litres
- Flow Rate per 24-Hour Period: 24,192,000 Litres

Once the socks need to be serviced/cleaned it only takes minutes to remove each sock and run them through the wringer. The concentrated oil is collected in a vessel under the wringer.

- All 316 Stainless Steel Construction -
